Abstract We give a short overview of Information Technology based research in agriculture at University of Veszprém, Georgikon Faculty of Agriculture. We will presented:

- History,
- Agriculture researches:
 - Plant production
 - Agrochemistry
 - Potato research
 - Horticulture
 - Plant protection
 - Animal breeding and nutrition
 - Agricultural mechanization
 - Information technology
 - Biology in the Lake Balaton
 - Image processing and GIS
 - 3D simulation
- Education and researches,
- Ph.D. researches,
- WirelessInfo WP14 objectives
